

Floor Mount Freestall System

The Most Open Freestall System On the Market

With a welcoming, open front, our floor mount freestall system is the most open system on the market. Designed specifically to work with mattresses, it also allows for easy height adjustments.

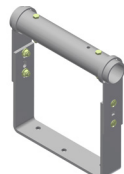

Utilizing existing concrete, this system helps reduce building and installation costs by eliminating the need for posts or columns.

All components of the Floor Mount Freestall System are hot dipped galvanized and can be paired with your choice of hot dipped or pre-galvanized loops.

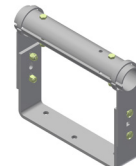

- Easy-Installation
- Designed for Mattresses
- Works with Deep Bedding
- Adjustable for Height
- Pair with Most Artex Loops
