

High-Velocity Jet Fans

Artex high-powered Jet fans are designed to instantly increase air velocity with a concentrated air stream that allows you to better target specific areas of your barn. The rugged design and aerodynamic venturi housing and narrow cone give you consistent performance and efficiency.

Designed for easy cleaning and long lifespan Artex Jet fans are belt-free and made with a high-density, durable, corrosion resistant fiber glass. These small but powerful fans are available in a variety of options from 1 to 3 phase motors to high-pressure fogging kits.

- Swivel Base Mounting System
- Corrosion-Resistant Housing
- Deep Venturi Housing

Available Sizes: 16", 20", and 36"

20" Peak Performance - 134 CMM | 4,750 CFM at 1,725 RPM

Basket Fans

A cost-effective addition to any ventilation strategy, Artex basket fans provide years of trouble-free service. These versatile fans come with a mounting bracket that allows for 180° adjustment, giving you a multitude of mounting options.

Belt-free, quiet, and easy to maintain, our basket fans feature curved blades that are 40% thicker than the competition. This curve ensures optimum performance and efficiency while the superior zinc coating prevents rust and corrosion.

- Minimal Noise and Vibrations
- Wall, Post, Ceiling Mount Options
- Fully Enclosed, Maintenance-Free Motors

Available Sizes: 16", 20", and 36"

36" Peak Performance - 264 CMM | 9,337 CFM at 825 RPM
