

Water Troughs

Now Available in Dumping & Non-Dumping Options

We've expanded our line of water troughs to include both dumping and non-dumping options. We offer a variety of depth and length option, giving you the ability to choose the right trough for your facility.

Our unique Aqua Dump design allows for easy cleaning of the dirt and grime that gets into your trough. Both troughs have been designed with easy float access, making maintenance a breeze.

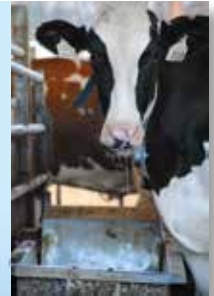

WATER TROUGH FEATURES

- Available in sizes from 60cm (2') to 457cm (15')
- Optional Leg Risers Available on Some Models
- Floor and Wall Mount Options on Dumping Troughs
- Comes in Hot Dipped Galvanized or Stainless Steel Options

DID YOU KNOW?

Modern dairy milking cows drink approximately 60 litres (16 gallons) of water a day, with high yielding cows potentially needing more. By weight, water is the most important nutrient in a milking cow's ration, making up 80% of the rations total weight.

WIDE VARIETY OF SIZES AVAILABLE

Our dumping and non-dumping water troughs are available in different sizes
